## 2. Defect Fixes

- a. The following defects were the main defects reported by customers and were fixed in this release of the driver.

<b>Defect Summary</b>	<b>Defect ID</b>
Cannot open the driver settings program with WiFi or VPN connected.	2077
Setup wizard does not open after finishing the installation process.	2213
Some preset shortcuts do not work with any international keyboard layouts other than the Qwerty layout (English keyboard layout).	2227
Hook issues when drawing lines quickly in Clip Studio Painter App.	2076
When a Quick Keys is disconnected from the system after the system goes into a deep sleep, the only way to wake the Quick Keys is by waking the system and activating the driver instead of just waking the system.	1375
When in portion mapping mode, if using a pen to go along the edge of the mapping area on a tablet, the pen cursor can get stuck at the edge of the mapping area of the screen.	2000
Pen cursor does not always reach the bottom of the screen.	1840
Unable to set volume adjustment settings (F11,F12) as a shortcut.	1901
Shift key does not work in Photoshop App.	1822
Issues in Zbrush App: 1. Control + Option + Left click shortcut does not work with pen hovering function. 2. Pan and Zoom function does not work (Right click+ Drag). 3. Mask function does not work (When use with Space Key).	1805
Modifiers are not released after being pressed in Illustrator App and Topaz Mask AI App.	2135
